

1.

I study Information Technology at Emil Kolben High School. Information technology is one of four fields provided by our school.

School offers base technical equipment for studying IT, in my opinion school is focused on other branches and forgot on us, because some computers and devices are very old and ain't providing the required performance for modern world.

At the beginning of this school year we've obtained license for Adobe programs, which are known for the best user interface, sadly we haven't got enough time to learn using them properly.

During my study I've seen many things and one of the best things which could ever met me was friendship between some teachers and me which I really like.

2.

Hi Mr. Holmes,

I would like to tell you, I've really enjoyed my time at camp. Whole program was just awesome.

Especially I would like to mention hide & seek day, which I loved most.

That leads my to my interest for some photos, can you send me some ?

I would be interested if you are planning another year.

Thank you for the best summer!

With best regards,
David.
